

Archive of Accreditation Actions - November 28, 2017

Consistent with ACOE policy, the ACOE publishes the following information about accreditation and pre-accreditation decisions:

- the type of program (professional optometric degree, optometric residency or optometric technician);
- the program's sponsor, and in the case of an optometric residency not sponsored by a school or college of optometry, the name of the affiliated optometric institution;
- accreditation status or action;
- the year of the next currently scheduled site visit; and
- the Council's summary of compliance with the standards, which specifies the Council's basis for any final decision. Updates to the summary of compliance will be published in subsequent reports of ACOE meeting actions when the ACOE determines that the standards are met.

Nov. 28, 2017

At its Oct. 27-29, 2017 fall meeting in Saint Louis, Missouri, the Accreditation Council on Optometric Education (ACOE) took the following actions: (Note: Date in parenthesis is the date of the next currently scheduled evaluation visit to the programs. Depending on the outcomes of annual reports, progress reports, interim visits, substantive program changes and other significant events affecting a program, the Council may decide to schedule a full on-site evaluation visit before the original accreditation period is complete. The accreditation period is eight years for professional optometric degree and optometric residency programs and seven years for optometric technician programs.)

Definitions of pre-accreditation classification and accreditation status

1. Preaccreditation Actions

None

2. Initial Accreditation

Classification of "Accredited" granted to the following programs following a full evaluation visit:

ChuVision Institute Residency in Refractive and Ocular Surgery, which is affiliated with Pacific University, College of Optometry (2025). The program was granted the status

of **Accredited**, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. The program fully meets the six standards for residency programs.

Eye Associates of New Mexico Residency in Primary Eye Care/Ocular Disease, which is affiliated with Midwestern University Arizona College of Optometry (2025). The program was granted the status of **Accredited**, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. The program issued a recommendation to meet Standard II following a site visit in 2017 and based on a subsequent progress report, the Council found the recommendation to be met. The program fully meets the six standards for residency programs.

ICON P.C. Residency in Refractive and Ocular Surgery/Ocular Disease, which is affiliated with Pacific University, College of Optometry (2025). The program was granted the status of **Accredited**, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. The program was issued recommendations to meet Standards I and II following a site visit in 2017 and based on a subsequent progress report submitted by the program, the Council found the recommendations to be met. The program fully meets the six standards for residency programs.

John Kenyon American Eye Institute Residency in Ocular Disease/Refractive Surgery, which is affiliated with Indiana University School of Optometry (2025). The program was granted the status of **Accredited**, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. The program was issued recommendations to meet Standards I and II following a site visit in 2017 and based on a subsequent progress report submitted by the program, the Council found the recommendations to be met. The program fully meets the six standards for residency programs.

Kaiser Permanente Residency in Primary Eye Care, which is affiliated with Southern California College of Optometry at Marshall B. Ketchum University (2025). The program was granted the status of **Accredited**, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. The program was issued recommendations to meet Standards I, III and V following a site visit in 2017 and based on a subsequent progress report submitted by the program, the Council found the recommendations to be met. The program fully meets the six standards for residency programs.

Lynn Community Health Center Residency in Community Health Optometry, which is affiliated with New England College of Optometry (2025). The program was granted the status of **Accredited**, based on the Council's determination that the program has no deficiencies or

weaknesses that compromise the educational effectiveness of the total program. The program fully meets the six standards for residency programs.

The Ohio State University College of Optometry Residency in Pediatric Optometry/Vision Therapy and Rehabilitation (2025). The program was granted the status of **Accredited**, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. The program fully meets the six standards for residency programs.

University of the Incarnate Word Rosenberg School of Optometry San Antonio Lighthouse for the Blind Residency in Low-Vision and Vision Rehabilitation (2025). The program was granted the status of **Accredited**, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. The program was issued a recommendation to meet Standard II following a site visit in 2017 and based on a subsequent progress report submitted by the program, the Council found the recommendation to be met. The program fully meets the six standards for residency programs.

Vision Center of West Phoenix Residency in Primary Eye Care, which is affiliated with University of Houston, College of Optometry (2025). The program was granted the status of **Accredited**, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. The program was issued recommendations to meet Standards II and V following a site visit in 2017 and based on a subsequent progress report submitted by the program, the Council found the recommendations to be met. The program fully meets the six standards for residency programs.

Womack Army Medical Center Residency in Vision Rehabilitation/Neuro-Optometric Rehabilitation, which is affiliated with State University of New York College of Optometry (2025). The program was granted the status of **Accredited**, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. The program was issued recommendations to meet Standards II and V following a site visit in 2017 and based on a subsequent progress report submitted by the program, the Council found the recommendations to be met. The program fully meets the six standards for residency programs.

3. Continuing Accreditation

Classification of "Accredited" continued following a full evaluation visit:

Amarillo VA Healthcare System Residency in Primary Eye Care and Ocular Disease, which is affiliated with Northeastern State University, Oklahoma College of Optometry (2025). The program was granted the status of **Accredited**, based on the Council's determination that

the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. The program was issued recommendations to meet Standards II and III following a site visit in 2017 and based on subsequent progress reports submitted by the program, the Council found the recommendations to be met. The program fully meets the six standards for residency programs.

Cincinnati VAMC Residency in Ocular Disease, which is affiliated with The Ohio State University, College of Optometry (2025). The program was granted the status of **Accredited**, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. The program was issued a recommendation to meet Standard V following a site visit in 2017 and based on a subsequent progress report submitted by the program, the Council found the recommendation to be met. The program fully meets the six standards for residency programs.

Eye Center of Texas Residency in Ocular Disease and Refractive and Ocular Surgery, which is affiliated with University of Houston, College of Optometry (2025). The program was granted the status of **Accredited**, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. The program was issued recommendations to meet Standards II and V following a site visit in 2017 and based on a subsequent progress report submitted by the program, the Council found the recommendations to be met. The program fully meets the six standards for residency programs.

EyeCare Associates of South Tulsa Residency in Ocular Disease, which is affiliated with Northeastern State University, Oklahoma College of Optometry (2025). The program was granted the status of **Accredited**, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. The program was issued a recommendation to meet Standard V following a site visit in 2017 and based on a subsequent progress report submitted by the program, the Council found the recommendation to be met. The program fully meets the six standards for residency programs.

Oklahoma Eye Institute Residency in Ocular Disease, which is affiliated with Northeastern State University, Oklahoma College of Optometry (2025). The program was granted the status of **Accredited**, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. The program was issued a recommendation to meet Standard II following a site visit in 2017 and based on a subsequent progress report submitted by the program, the Council found the recommendation to be met. The program fully meets the six standards for residency programs.

Omni Eye Specialists of Baltimore Residency in Ocular Disease/Co-Management, which is affiliated with Pennsylvania College of Optometry at Salus University (2025). The program was granted the status of **Accredited**, based on the Council's determination that the program has no

deficiencies or weaknesses that compromise the educational effectiveness of the total program. The program was issued recommendations to meet Standard V following a site visit in 2017 and based on a subsequent progress report submitted by the program, the Council found the recommendations to be met. The program fully meets the six standards for residency programs.

San Francisco VAMC Residency in Primary Eye Care, which is affiliated with University of California, Berkeley, School of Optometry (2025). The program was granted the status of **Accredited**, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. The program fully meets the six standards for residency programs.

Southern Arizona VA Health Care System, Tucson Residency in Ocular Disease / Low Vision Rehabilitation, which is affiliated with Southern California College of Optometry at Marshall B. Ketchum University (2025) The program was granted the status of **Accredited**, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. The was issued a recommendation to meet Standard III following a site visit in 2017 and based on a subsequent progress report submitted by the program, the Council found the recommendation to be met. The program fully meets the six standards for residency programs.

University of Houston College of Optometry Residency in Ocular Disease at Cedar Springs Eye Clinic (2025). The program was granted the status of **Accredited**, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. The program fully meets the six standards for residency programs.

VA N. Indiana Health Care System, Fort Wayne Residency in Primary Eye Care / Ocular Disease, which is affiliated with Ferris State University Michigan College of Optometry (2025). The program was granted the status of **Accredited**, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. The program fully meets the six standards for residency programs.

VA Roseburg Healthcare System Residency in Primary Eye Care/Ocular Disease - Department of Veterans Affairs, which is affiliated with Pacific University, College of Optometry (2025). The program was granted the status of **Accredited**, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. The program fully meets the six standards for residency programs.

Veterans Affairs Palo Alto Health Care System Residency in Primary Eye Care / Low Vision Rehabilitation, which is affiliated with University of California, Berkeley, School of Optometry (2025). The program was granted the status of **Accredited**, based on the Council's

determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. The program fully meets the six standards for residency programs.

4. Reconsideration of Accreditation Denial

None

5. Withdrawal of accreditation by ACOE

None

6. Voluntary withdrawal of accreditation

None

Definitions

Pre-Accreditation Classification

In the case of a program which is not fully operational, the Council may grant the pre-accreditation status of preliminary approval following satisfaction by the program of the requirements for initial application in Chapter 4 and the Council's review of an evaluation team report following a site visit:

Preliminary Approval — A pre-accreditation classification granted to a professional optometric degree program that has clearly demonstrated it is developing in accordance with Council standards. The program has approval to begin student recruitment, selection and admissions, and to begin offering the program. The Council shall review the preliminary approval classification annually during the first three academic years of the program through written reports and/or site visits as deemed necessary by the Council. A request for accreditation status shall be made not less than 12 months prior to graduation of the program's first class. As required by the USDE, the Council will not grant pre-accreditation status to a program for longer than five years.

When the Council awards preliminary approval to a program or at any time during the Council's monitoring of a program holding preliminary approval status, the ACOE may issue recommendations or specify conditions for monitoring, which must be attained in order to maintain the pre-accreditation status.

Accreditation Status

The Accreditation Council on Optometric Education may decide to grant one of the two following accreditation statuses to a program following adoption of the evaluation team report and recommendations. Accreditation status may be lowered or revoked if the Council determines that the program is not making sufficient progress on recommendations from the Council.

Accredited — A classification granted to an educational program indicating that the program generally meets the standards for accreditation. This classification indicates that the program

has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. However, recommendations relating to marginal compliance with certain standards, and suggestions relating to program enhancement may be included in evaluation reports.

Accredited with Conditions — A classification granted to an educational program with major deficiencies or weaknesses with reference to the standards of accreditation. This classification indicates that the educational effectiveness of the program is in jeopardy. Programs with this classification will be required to submit progress reports and shall undergo a full on-site evaluation visit within a prescribed period of: one year for programs that are less than one year in length; 18 months for programs that are at least one year in length but less than two years in length; and two years for programs that are more than two years in length.
