

Archive of ACOE Accreditation Actions and decisions - March 29, 2022

Updated November 2023

Consistent with Accreditation Council on Optometric Education (ACOE) policy, the ACOE publishes the following information about accreditation and pre-accreditation decisions:

- the type of program (professional optometric degree, optometric residency or optometric technician);
- the program's sponsor, and in the case of an optometric residency not sponsored by a school or college of optometry, the name of the affiliated optometric institution;
- accreditation status or action;
- the year of the next currently scheduled site visit; and
- the Council's summary of compliance with the standards, which specifies the Council's basis for any final decision. Updates to the summary of compliance will be published in subsequent reports of ACOE meeting actions when the ACOE determines that the standards are met.

[Definitions of pre-accreditation classification and accreditation status](#)

At its February 25-27, 2022 virtual meeting, the Accreditation Council on Optometric Education (ACOE) took the following actions: (Note: Date in parenthesis is the date of the next currently scheduled evaluation visit to the programs. Depending on the outcomes of annual reports, progress reports, interim visits, substantive program changes and other significant events affecting a program, the Council may decide to schedule a full on-site evaluation visit before the original accreditation period is complete. The accreditation period is eight years for professional optometric degree, optometric residency and optometric technician programs.)

Visits that were conducted virtually are indicated; a follow-up on-site visit will be conducted within a reasonable timeframe.

1. Preaccreditation Actions: None

2. Initial Accreditation: None

3. Continuing Accreditation:

Classification of "Accredited" continued following a site visit:

A. Brooke Army Medical Center Residency in Primary Care Optometry, which is affiliated with University of the Incarnate Word Rosenberg School of Optometry (2029). The program's status of Accredited was continued, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. Updated November 2022: The program was issued recommendations to meet Standard V following a site visit in 2021 and based on a subsequent progress report submitted by the program, the Council found the recommendations to be met. The program now fully meets the six standards for residency programs.

B. Captain James A. Lovell Federal Health Care Center Residency in Primary Eye Care/Ocular Disease, which is affiliated with Illinois College of Optometry (2029). The program's status of Accredited was continued, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. Updated November 2022: The

program was issued a recommendation to meet Standard V following a site visit in 2021 and based on a subsequent progress report submitted by the program, the Council found the recommendation to be met. The program now fully meets the six standards for residency programs.

C. Henry Ford OptimEyes Residency in Primary Eye Care, which is affiliated with Ferris State University Michigan College of Optometry (2029). The program's status of Accredited was continued, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. Updated November 2022: The program was issued recommendations to meet Standards II and V following a site visit in 2021 and based on a subsequent progress report submitted by the program, the Council found the recommendations to be met. The program now fully meets the six standards for residency programs.

D. (Virtual) Illinois College of Optometry Residency in Ocular Disease/ Primary Eye Care (2029). The program's status of Accredited was continued, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. The program fully meets the six standards for residency programs.

E. (Virtual) Lebanon VA Medical Center Residency in Ocular Disease and Low Vision Rehabilitation, which is affiliated with Pacific University College of Optometry (2029). The program's status of Accredited was continued, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. **Updated November 2022:** The program was issued recommendations to meet Standards III and V following a site visit in 2021 and based on a subsequent progress report submitted by the program, the Council found the recommendations to be met. The program now fully meets the six standards for residency programs.

F. Massachusetts Eye and Ear Infirmary Residency in Ocular Disease and Cornea/Contact Lenses, which is affiliated with New England College of Optometry (2029). The program's status of Accredited was continued, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. Updated March 2023: The program was issued a recommendation to meet Standard III following a site visit in 2021 and based on a progress report submitted by the program, the Council found the recommendation to be met. The program now fully meets the six standards for optometric residency programs.

G. New England College of Optometry Professional Optometric Degree Program (2029). The program's status of Accredited was continued, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. Updated November 2022: The program was issued recommendations to meet Standards II and IV following a site visit in 2021 and based on a subsequent progress reports submitted by the program, the Council found the recommendations to be met. The program now fully meets the eight standards for professional optometric degree programs.

H. Northeastern State University Oklahoma College of Optometry (2029). The program's status of Accredited was continued, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. Updated March 2023: The program was issued recommendations to meet Standards I, II and V following a site visit in 2021 and based on a progress report submitted by the program, the Council found the recommendations to be met. The program now fully meets the eight standards for professional optometric degree programs.

I. Northport VAMC Residency in Primary Eye Care, Vision Therapy and Low Vision, which is affiliated with State University of New York College of Optometry (2029). The program's status of Accredited was continued, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. Updated March 2023: The program was issued a recommendation to meet Standard II following a site visit in 2021 and based on a progress report submitted by the program, the Council found the recommendation to be met. The program now fully meets the six standards for optometric residency programs.

J. (Virtual) State University of New York College of Optometry Residency in Pediatric Optometry (2029). The program's status of Accredited was continued, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. The program fully meets the six standards for residency programs.

K. (Virtual) Tuba City Regional Health Care Corporation Indian Health Service Residency in Primary Eye Care, which is affiliated with Southern California College of Optometry at Marshall B. Ketchum University (2029). The program's status of Accredited was continued, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. Updated March 2023: The program was issued recommendations to meet Standard V following a site visit in 2021 and based on a progress report submitted by the program, the Council found the recommendation to be met. The program now fully meets the six standards for optometric residency programs.

L. VA Boston Healthcare System, Jamaica Plain Residency in Vision Rehabilitation with emphases in Low Vision Rehabilitation and Brain Injury Rehabilitation, which is affiliated with New England College of Optometry (2029). The program's status of Accredited was continued, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. The program fully meets the six standards for residency programs.

M. (Virtual) VA Portland Health Care System Residency in Primary Eye Care and Ocular Disease, which is affiliated with Pacific University College of Optometry (2029). The program's status of Accredited was continued, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. The program fully meets the six standards for residency programs.

N. VA Southern Nevada Healthcare System, Las Vegas Residency in Ocular Disease, which is affiliated with Southern California College of Optometry at Marshall B. Ketchum University (2029). The program's status of Accredited was continued, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. Updated November 2022: The program was issued a recommendation to meet Standard II following a site visit in 2021 and based on a subsequent progress report submitted by the program, the Council found the recommendations to be met. The program now fully meets the six standards for residency programs.

O. Wow Vision Therapy Residency in Vision Rehabilitation with emphases in Vision Therapy, Vision Rehabilitation and Pediatric Optometry, which is affiliated with Southern College of Optometry (2029). The program's status of Accredited was continued, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. Updated November 2023: The program was issued recommendations to meet Standards III and V following a site visit in 2021 and based on subsequent progress reports submitted by the program,

the Council found the recommendations to be met. The program now fully meets the six standards for residency programs.

P. (Virtual) Zuni Comprehensive Community Health Center Indian Health Service Residency in Ocular Disease with emphasis in Primary Eye Care, which is affiliated with Southern California College of Optometry at Marshall B. Ketchum University (2029). The program's status of Accredited was continued, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. The program fully meets the six standards for residency programs.

4. Reconsideration or Appeal of Adverse Action or Determination of Accredited with Conditions:

Virginia Eyecare Clinic Residency in Primary Care with emphases in Family Practice and Ocular Disease, which is affiliated with Pennsylvania College of Optometry at Salus University. The program submitted a written petition for reconsideration within 30 days of the date ACOE's notification of withdrawal of accreditation was received. The ACOE considered the program's petition at its February 25-27, 2022 meeting and determined the facts upon which the Council's decision to withdraw accreditation no longer exist or have changed significantly. The ACOE overturned its decision to withdraw accreditation. The program retains the status of Accredited.

5. Withdrawal of accreditation by ACOE: None

6. Voluntary withdrawal of accreditation: None

Note: In addition to the above accreditation actions, the ACOE also reviewed the following program(s) applying for initial application as a professional optometric degree program. (Stage One Applicant and Stage Two Applicant are not official pre-accreditation classifications, but rather steps toward pre-accreditation.)

Designation of Stage One Applicant

- University of Detroit Mercy

Designation of Stage Two Applicant

- None
-

Definitions

Preaccreditation Classification: In the case of a program which is not fully operational, the Council may grant the preaccreditation status of Preliminary Approval following satisfaction by the program of the requirements for initial application as outlined in the ACOE's Policy and Procedure Manual and the Council's review of an evaluation team report following a site visit.

Preliminary Approval: A preaccreditation classification granted to a professional optometric degree program that has clearly demonstrated it is developing in accordance with Council Standards. The program has approval to begin student recruitment, selection and admissions and to begin offering the program. The Council shall review the preliminary approval classification annually during each academic year of the program through written reports and/or evaluation visits as

deemed necessary by the Council. The Council will conduct a final on-site evaluation visit to the program for the consideration of an accreditation status during the academic year in which the first class is expected to graduate. If the program is found to meet the Council's Standards, then the Council will grant an appropriate accreditation status. As required by the USDE, the Council will not grant preaccreditation status to a program for longer than five years. When the Council awards Preliminary Approval to a program or at any time during the Council's monitoring of a program holding Preliminary Approval status, the ACOE may issue recommendations or specify conditions for monitoring, which must be attained in order to maintain the preaccreditation status.

Accreditation Status: The ACOE may decide to grant one of the two following accreditation statuses to a program following adoption of the evaluation team report and recommendations. Accreditation status may be lowered or revoked if the Council determines that the program is not making sufficient progress on recommendations from the Council.

Accredited: A classification granted to an educational program indicating that the program generally meets the standards for accreditation. This classification indicates that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. However, recommendations relating to marginal compliance with certain standards, and suggestions relating to program enhancement may be included in evaluation reports.

Accredited with Conditions: A classification granted to an educational program with major deficiencies or weaknesses with reference to the standards of accreditation. This classification indicates that the educational effectiveness of the program is in jeopardy. Programs with this classification will be required to submit progress reports and shall undergo a full evaluation visit within two (2) years for professional optometric degree programs, eighteen (18) months for optometric residencies, and one (1) year for optometric technician programs.

The ACOE Policies and Procedure Manual may be found in the [Accreditation Resources and Directories of Programs](#) section.
